DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “steering motor” and “vehicle” (claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
2. Figs. 2 and 3 fail to comply with 37 CFR 1.84(m) as they contain solid black shading.
3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Masaaki JP 2002-160659.

Masaaki discloses a feedback assembly for an electronically controlled electro-mechanical actuating unit for a motor vehicle, the feedback assembly comprising:

a connection to the actuating unit, a shaft 13A, which is angularly fixed to a steering member 1 of the motor vehicle, and an electrical actuator 9, which is angularly coupled to the shaft for exerting a resistant torque on the shaft itself according to the conditions of movement of the motor vehicle;

the feedback assembly being characterized in that it comprises a first mechanical

transmission 13C with concurrent axes , which is set between the electrical actuator and the shaft . wherein it comprises a relative measurement device 3 of an angular position of the shaft, and a second mechanical transmission with concurrent axes which is set between the relative-measurement device and the shaft itself;

wherein the feedback assembly comprises an absolute measurement device 3 of an angular position of the shaft.

Allowable Subject Matter

8. Claims 4-5, 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose feedback devices for power steering systems.
